Volume 252 No. 1

Maximising the use of biological nitrogen fixation in agriculture

Report of an FAO/IAEA technical expert meeting held in Rome, 13–15 March 2001

Guest editors:
G. Hardarson & W. J. Broughton

Foreword
M. Solh and J.D. Dargie **vii**

The success of BNF in soybean in Brazil
B.J.R. Alves, R.M. Boddey and S. Urquiaga **1–9**

Diversity of *Rhizobium-Phaseolus vulgaris* symbiosis: overview and perspectives
E. Martínez-Romero **11–23**

Role of biological nitrogen fixation in legume based cropping systems; a case study of West Africa farming systems
N. Sanginga **25–39**

Optimising biological N_2 fixation by legumes in farming systems
G. Hardarson and C. Atkins **41–54**

Beans (*Phaseolus* spp.) – model food legumes
W.J. Broughton, G. Hernandez, M. Blair, S. Beebe, P. Gepts and J. Vanderleyden **55–128**

Signals exchanged between legumes and *Rhizobium*: agricultural uses and perspectives
W.J. Broughton, F. Zhang, X. Perret and C. Staehelin **129–137**

Endophytic nitrogen fixation in sugarcane: present knowledge and future applications
R.M. Boddey, S. Urquiaga, B.J.R. Alves and V. Reis **139–149**

Nitrogen fixation in rice systems: state of knowledge and future prospects
J.K. Ladha and P.M. Reddy **151–167**

Endophytic colonization of plant roots by nitrogen-fixing bacteria
E.C. Cocking **169–175**

How can increased use of biological N_2 fixation in agriculture benefit the environment?
E.S. Jensen, H. Hauggaard-Nielsen **177–186**

Volume 252 No. 2

Seasonal changes in element contents in mangrove element retranslocation during leaf senescene
W.-Q. Wang, M. Wang and P. Lin **187–193**

Organic matter transformations and soil fertility in a treed pasture in semiarid NE Brazil
H. Tiessen, R.S.C. Menezes, I.H. Salcedo and B. Wick **195–205**

Effect of heterogeneous distribution of nutrients on root growth, ABA content and drought resistance of wheat plants
V.K. Trapeznikov, I.I. Ivanov and G.R. Kudoyarova **207–214**

Mineral nutrition and growth of tropical maize as affected by soil acidity
J. Sierra, C. Noël, L. Dufour, H. Ozier-Lafontaine, C. Welcker and L. Desfontaines **215–226**

Long-term availability of nutients in forest soil derived from fast- and slow-release fertilizers
T. Aarnio, M. Räty and P.J. Martikainen **227–239**

Soil physical properties associated with the invasive spotted knapweed and native grasses are similar
T.D. Sperber, J.M. Wraith and B.E. Olson **241–249**

Growth of a root system described as diffusion. II. Numerical model and application
M. Heinen, A. Mollier and P. De Willigen **251–265**

Accumulation of rare earth elements in maize plants (*Zea mays* L.) after application of mixtures of rare earth elements and lanthanum
X. Xu, W. Zhu, Z. Wang and G.-J. Witkamp **267–277**

The production of ectomycorrhizal mycelium in forests: Relation between forest nutrient status and local mineral sources
D. Hagerberg, G. Thelin and H. Wallander **279–290**

Phytoavailability of Cd and Zn in soil estimated by stable isotope exchange and chemical extraction
A.S. Ayoub, B.A. McGaw, C.A. Shand and A.J. Midwood **291–300**

Release of phenols from *Lupinus albus* L. roots exposed to Cu and their possible role in Cu detoxification
C. Jung, V. Maeder, F. Funk, B. Frey, H. Sticher and E. Frossard **301–312**

The effect of nitrogen fertilization on nitrogen use efficiency of irrigated and non-irrigated tobacco (*Nicotiana tabacum* L.). *Nitrogen use efficiency in tobacco*
M.I. Sifola and L. Postiglione **313–323**

Seedling vigour and the early growth of transplanted rice (*Oryza sativa*)
C. Ros, R.W. Bell and P.F. White **325–337**

Soil P-status and cultivar maturity effects on pea-*Rhizobium* symbiosis
M. Labidi, A.B.K. Dahmane, H.B. Mansour, L. Khiari and D. Ahmad **339–348**

Resource remobilization in *Quercus ilex* L. resprouts
B. El Omari, X. Aranda, D. Verdaguer, G. Pascual and I. Fleck **349–357**

Growth and solute composition of the salt-tolerant kallar grass [*Leptochloa fusca* (L.) Kunth] as affected by nitrogen source
T. Mahmood and W.M. Kaiser **359–366**

Short-term increases in relative nitrification rates due to trenching in forest floor and mineral soil horizons of different forest types
M. Lavoie and R.L. Bradley **367–384**

Phenolic acids: Possible agents of modifying N_2-fixing symbiosis through rhizobial alteration?
G. Seneviratne and H.S. Jayasinghearachchi **385–395**

Fish emulsion as a food base for rhizobacteria promoting growth of radish (*Raphanus sativus* L. var. *sativus*) in a sandy soil
K.A. El-Tarabily, A.H. Nassar, G.E. St. J. Hardy and K. Sivasithamparam **397–411**

Erratum **413–414**

Volume contents **415–417**

Author index **419**

Instructions for authors **421–427**
